

# Snapshot Material Solutions

Do you ever walk past the machines in your factory to find that raw materials are being constantly wasted? Have you ever wondered how this is affecting the overall profitability of your business?

FIRA are offering a program to help you to improve your material utilisation by focusing on a specific area of your business and deliver sustained

## What do Snapshot Material Solutions offer?

Using a hands on, structured approach, our Master Engineers will work with your operations team in a focus area of your choice to identify the root cause of your material problems.

By applying the following proven tools and techniques, FIRA will help provide solutions and improvements to reduce costs and enhance your profitability.

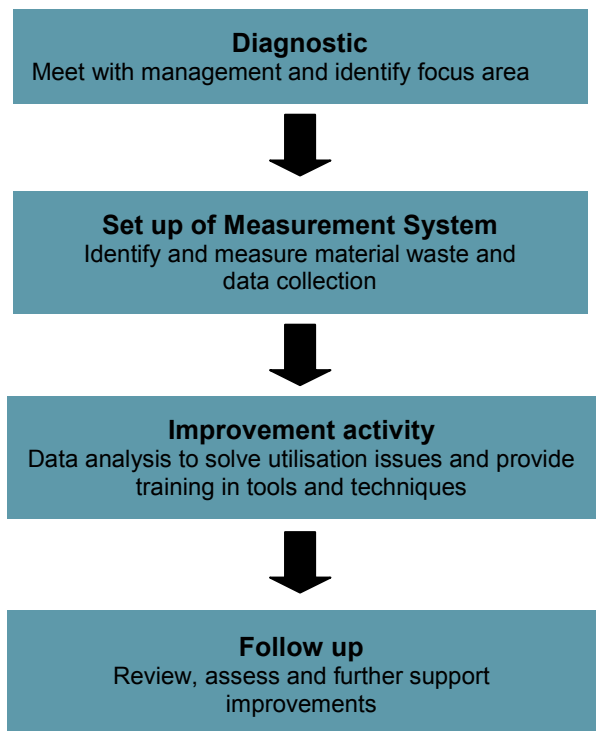

- Data Collection and Analysis
- Problem Solving
- Visual Management
- Standard Operations

Not only will our engineers bring with them the knowledge and experience of the furniture industry, but they will also provide you with an essential sustainability kit to ensure that the improvements implemented are measured and sustained overtime.

## Why is it for me?

This programme will give you the opportunity to;

- Reduce the cost of materials
- Address a burning process and material issue
- Improve material utilisation through processes

## What will it do?

- Improve the utilisation of materials through key processes
- Reduce material waste
- Reduce costs and improve profitability
- Create employee awareness and ownership

## The Next Step:
