Club Green

Stage 1 Membership

Stage 2 Membership

What is Club Green?

The complexity of environmental legislation presents businesses with a significant challenge. Club Green assists companies across the furniture industry supply chain with the guidance and support to achieve compliance now, and in the future.

The scheme, initiated in 1997, aims to save you time by guiding you through the legal requirements that come out of current and new legislation, including how you dispose of waste, source timber or regulate air emissions.

Why join Club Green?

Environmental legislation in the UK and Europe is becoming increasingly stringent, so it is really important that organisations understand how it applies to them. There are many clauses within the latest ISO environmental management system (ISO14001:2015) which stipulate that organisations must demonstrate that they understand their compliance obligations. Club Green can help with the challenge of meeting these compliance requirements.

CLUB GREEN PROVIDES:

Advice and support on environmental legislation and compliance.

Quarterly updates enable members to navigate the uncertainties of operating within a fast evolving, regulatory framework and avoid potential exposure.

WHAT OUR MEMBERS SAY:

'I needed to quickly understand how environmental legislation affects us and how I can comply. Club Green was the answer'

Angela Keenan TMJI

'Club Green has saved me from reading endless legal documents by providing regular concise updates. Plus, the useful helpline service has put an end to legislation headaches!'

Tom O'Connor Morrells

WHAT DO MEMBERS RECEIVE?

Stage One Membership - £300 +VAT per year

Comprehensive Club Green Environment Manual -

Each member receives an Environment Manual which clearly sets out the current legislation and provides guidance on how to comply. It also contains a Legislation Register, required for achieving ISO 14001 certification.

Quarterly Club Green Newsletter -

The quarterly newsletter provides valuable legal updates, news and key information about all existing and forthcoming legislation, such as the recently implemented EU Timber Regulation.

Legislation guidance helpline -

Assistance with company environmental management; we are always available by email or phone to help answer your questions.

Stage Two Membership - £750 +VAT per year

As well as the benefits outlined above in Stage One, Club Green Stage Two includes:

Site Review - A Club Green Consultant will visit your premises and provide a tailored service to your organisation. They will review your business operation, determine whether the environmental aspects and impacts register is comprehensive and assess whether the prevailing legislation is understood and complied with.

Club Green Certification - Audited members will receive Club Green Certification to demonstrate compliance, which can be used in tenders to show your commitment to maintaining robust environmental management systems.
